Mining Algo Change - Oct 1, 2019

Why? ASICs

What? Putting Tiger Hash in front of Keccak-512 (0x4), and Luffa-512 (0x6), SHA-512 (0xF),

When? Oct 1, 2019 16:00 UTC

How? Upgrade to version 2.5.x.x

Ravencoin Wiki

Latest News: Ravencoin upgraded to version 2.5.1! (August 28, 2019) [↗](#). Critically important update!! When updating, make sure you have backed up your wallet.dat file. Are you unsure or do you encounter issues when upgrading, please use #helpdesk channel at [Ravencoin Community Discord](#) [↗](#).

[Ravencoin](#) [\(KR\)](#) [↗](#) is a project built on a code fork of [bitcoin](#) [↗](#) version 0.15.99. Ravencoin fairly launched on the 3rd of January 2018 without ICO, premine or masternodes and was announced by Bruce Fenton [on twitter](#) [↗](#). Ravencoin is focused on building open-source technology and has a strong and growing [community](#). Ravencoin aims to implement simple issuance and management of tradable [assets](#) on a blockchain. To avoid centralized ASIC mining of Ravencoin the developers created a new algorithm, X16R [\(FR\)](#) [\(KR\)](#) [\(DE\)](#) [↗](#). What makes X16R unique is the changing order of 16 hashing algorithms based on the hash of the previous block. This random reordering of hashing algorithms makes it reasonably resistant to ASIC development. The developers have also stated they are committed to keeping it ASIC free and can easily alter the algorithm if an ASIC is developed. The core team has produced a roadmap with a [development plan of 7 phases](#). [The roadmap](#) [↗](#) for the code development was published on the project's [github](#) [↗](#) on the 3rd of April 2018. [The white paper](#) [\(KR\)](#) [\(DE\)](#) [↗](#) describing the background and intention of the project was published on the same date on [Ravencoin.org](#) and Bruce Fenton posted a [Twitter thread](#) [↗](#) summarizing some key points of the whitepaper and growth of the project to date. At the time of launch, the core team was funded by [Medici Ventures](#) [↗](#) who are owned by [Overstock.com](#) [↗](#) - Patrick Byrne, CEO of Overstock, talks [about Ravencoin in this BusinessInsider interview](#) [↗](#). A collection of interviews with Tron Black (lead dev), Patrick Byrne, and Bruce Fenton, is available [here](#) [↗](#).

Ravencoin Asset Support since Launch (Nov 5th, 2018)

Date	Company	Company Info	Relation to Ravencoin
20/05/19	EQUA Start ↗	EQUA Start is a platform for cap table management ↗	Uses Ravencoin for capitalization tables and messaging ↗ (EQUA) ↗
20/05/19	NVRMOR.io ↗	Crypto Collective Art Project	Uses Ravencoin to tokenize art. Uses asset NVRMOR ↗
29/04/19	Playmaker ↗	Develops a solution for training data storage using the blockchain technology	Will use Ravencoin for their crowdfunding campaign.
